

Zavoral Music Studios

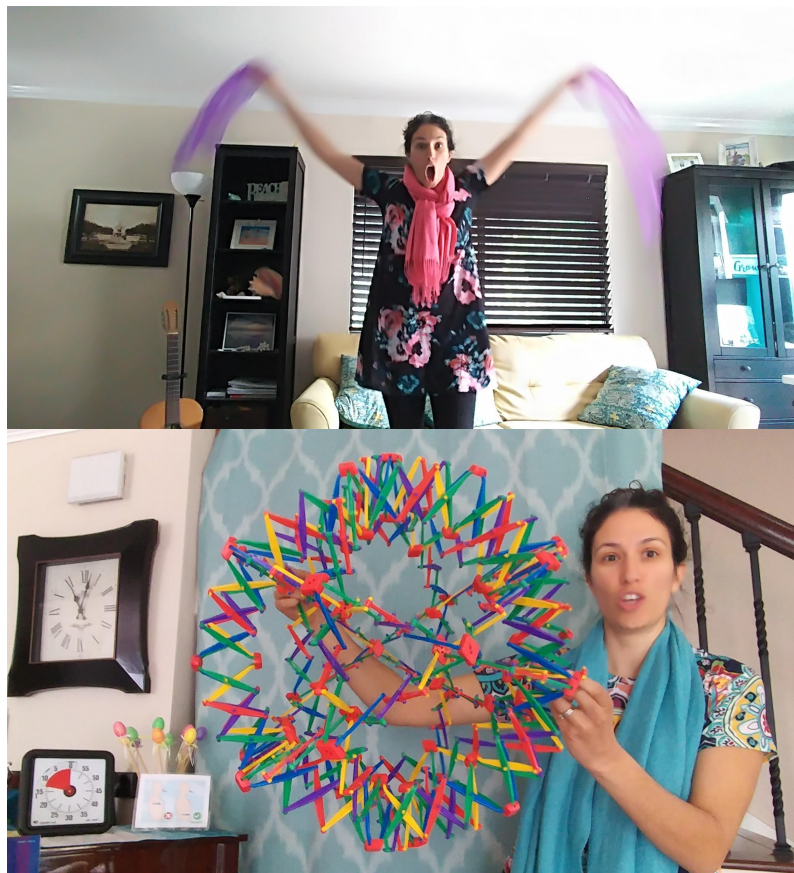

Meet The Orchestra

Meet the Orchestra is an active class that takes a multi-sensory approach. Each week we will focus on a different family of instruments- strings, brass, woodwinds, and percussion.

Mrs. Zavoral demonstrates various instruments for children to observe and discuss. Kinetic learning occurs as we play movement games to music by Beethoven, Mozart, and soundtracks like Harry Potter and Star Wars. Follow-the-leader games help us learn how to conduct the music, too! Along the way, we will practice techniques for playing the featured instruments. This includes learning how to buzz our lips and strengthen our string & bowing muscles. Every class ends with a sing-aloud book that ties into our weekly theme.

Throughout the class, children increase their musical repertoire, vocabulary, cultural awareness and critical listening skills. Students need only internet connection to participate.

Music Around the World

Music Around the World is an engaging class that takes a multi-sensory approach. Each week focuses on a different area of the world, from the Carribean to Southeast Asia and everywhere in between!

Aural and visual learning takes place while Mrs. Zavoral demonstrates world instruments and teaches songs in native languages. Children get moving as we learn dance steps to traditional music. We will also learn games and body percussion to children's folk songs, rhymes and chants. Hands-on experiences are also at play as children learn to turn common objects (such as pencils, cereal boxes and shoes) into their own world instruments that can accompany the songs we sing. Every class ends with a sing-aloud book that ties into our world themes.

During our "travels," children will grow their creativity, vocabulary, cultural awareness and executive functioning skills. Students need only internet connection to participate.
